

Alessandro Pinto | Curriculum Vitae

✉ apinto@berkeley.edu • 🌐 <https://alessandro-pinto.github.io/>
in alessandro-pinto • 🔑 PMwlwE0AAAAJ

Research Interests

Rigorous systems engineering; design methodologies for high-assurance autonomous systems; architectures, analysis, and synthesis.

Education

University of California, Berkeley <i>Electrical Engineering and Computer Sciences, Ph.D.</i> "A Platform-Based Approach to Communication Synthesis for Embedded-Systems"	Berkeley, CA 2008
University of California, Berkeley <i>Electrical Engineering and Computer Sciences, M.S.</i> "Synthesis of On-chip Communication Networks"	Berkeley, CA 2003
University of Rome "La Sapienza" <i>Electrical Engineering, Laurea, Summa Cum Laude</i> "Design and Implementation of digital receivers for 2/4/8PSK - 16/32/64QAM Trellis-Coded Signals"	Rome, Italy 1999

Professional and Academic Positions

NASA Jet Propulsion Laboratory, California Institute of Technology <i>Autonomy Assurance Lead</i> Development of processes, methods, and tools to engineer dependable autonomous systems for space exploration.	Pasadena, CA 2022–present
University of California, Santa Cruz <i>Associate Adjunct Professor of Electrical and Computer Engineering</i> Research on formal methods for the analysis of cyber-physical systems.	Santa Cruz, CA 2022–present
Nextpower <i>Consultant</i> Architectural analysis of control systems.	Fremont, CA 2026 – present
Lockheed Martin Corporation <i>Consultant</i> Compositional methods for the analysis of defense systems.	Cherry Hill, NJ 2023 – 2025
Raytheon Technologies Research Center <i>Technical Fellow, Embedded Autonomous Systems</i> Definition of multi-year research and development roadmaps. Technical oversight of research projects. Transition of technologies from research to product. Mentoring and developing talent.	Berkeley, CA 2018–2022
United Technologies Research Center <i>Associate Director, Research, Autonomous and Intelligent Systems</i> Development of technical roadmaps for knowledge acquisition and representation, reasoning methods, and architectural design of distributed autonomous and intelligent systems. Transition of technology to business units. Proposal writing and project execution.	Berkeley, CA 2014–2017
United Technologies Research Center, Berkeley, CA <i>Staff Engineer, Autonomous and Intelligent Systems & Design Methods</i> Development of tools for system design and verification, and on-line reasoning and decision-making. Proposal writing, technical project execution, software development and delivery.	Berkeley, CA 2008–2014
Ericsson Lab Italy <i>Consultant</i> Implementation of system-level models of wireless communication systems. Design of system-on-chips including co-simulation of hardware and firmware, testing, and validation.	Rome, Italy 1999–2001

Recognitions

Frontiers of Engineering Alumnus

National Academy of Engineering

2019

One of 116 selected emerging engineering leaders across the US from industry, academia, and national laboratories.

Technical Excellence Award

United Technologies Research Center

2017

Given to one member of the research staff each year in recognition of significant technical contribution.

Outstanding Achievement Award

United Technologies Corporation

2015

Given to one engineering team each year; recognition for significant contribution to autonomous vertical flight.

Past and Present Projects

PAAS: Proactive Assurance of Autonomous Systems

Principal Investigator

NASA Jet Propulsion Laboratory, California Institute of Technology

2024–

Development of an engineering lifecycle approach to assured autonomous systems for space applications.

Safe Aviation Autonomy with Learning-enabled Components in the Loop

Co-Principal Investigator

NASA University Leadership Initiative

2020–2022

(In collaboration with MIT, Georgia Tech, Stanford (Prime), MIT Lincoln Laboratory,

University of New Mexico, Hampton University, UC Berkeley.)

Development of compositional analysis methods for autonomous systems.

Hybrid Efficient Reasoning Method for Explainable and Scalable formal methods

Principal Investigator

DARPA I2O “Cyber-Assured Systems Engineering (CASE)”

2018–2022

(In collaboration with University of Iowa and Stanford University.)

Development of formal modeling and analysis tools for cyber-systems and their security properties.

Autonomous Cargo Handling System for the 777 Freighter

Principal Investigator

Collins Aerospace

2016–2019

Development of perception and control architectures and algorithms for introducing intelligence and automation in current cargo handling systems.

Autonomous Crew Enhancement System

Co-Principal Investigator

DARPA TTO “Aircrew Labor In-Cockpit Automation System (ALIAS)”

2015–2018

(In collaboration with Sikorsky Aircraft Corporation) Development of a system to automate aviation tasks and reduce aircrew workload.

Development of knowledge modeling and verification tools for the UH-60 knowledge base.

Modeling and Verification of Human-Machine Systems

Principal Investigator

Office of Naval Research

2015 – 2019

Development of models and automated analysis methods for systems featuring humans and autonomous systems collaborations; application to rotary-wing and underwater missions.

Contract-Based Development and Deployment

Principal Investigator

DARPA STO “Communication in Contested Environments (C2E)”

2014–2017

Development of a new design system based on component contracts applied to software-defined radios.

Architectures and Algorithms for Autonomous Systems

Principal Investigator

United Technologies Research Center

2011–2013

Development of an architecture for autonomous systems; development of planning algorithms with application to helicopter missions.

Complex System Design and Analysis

Co-Principal Investigator

DARPA TTO “Adaptive Vehicle Make”

2010–2011

Development of tools for model creation, design space exploration, and evaluation of complexity metrics applied to multi-mission Unmanned Aerial Vehicles.

Stochastic Analysis and Design of Systems

Principal Investigator

DARPA TTO

2010–2011

Development of a software library for the simulation and verification of Discrete Time Stochastic Hybrid Systems.

Student Mentorship Experience

- Garrett Schueller. PhD Student at UT Austin. Strategic University Research Partnerships (SURP) recipient, 2024 –
- Qi Heng Ho. PhD Student at UC Boulder. Strategic University Research Partnerships (SURP) recipient, 2024 –
- Abhishek Chavan. UC Santa Cruz. MSc in Computer Science and Engineering, 2024 –

- Gowrav Bukkapattana Gururaj. UC Santa Cruz. MSc in Electrical and Computer Engineering, 2024 –
- Albert Lin. PhD Student at University of Southern California (USC). NASA Space Technology Graduate Research Opportunity (NSTGRO) recipient, 2023–2025
- Navin Vijey Raj Jeyaselvan, Yinu Guo, Sameer Bhuvaji, Jeffrey Tsang. UC Berkeley. MEng Capstone Project, 2023–2024
- Nikhil Naik. PhD Student at USC. Summer internship at NASA JPL, 2023
- Paul Meng. PhD Student at U Iowa. Summer internship at the United Technologies Research Center, 2016
- Mohak Bhardwaj, Shivam Gautam, Dorothy Kirlew, Pranav Maheshwari, Richa Varma. Carnegie Mellon University. MSc in Robotic Systems Development, 2015 – 2016
- Tianyi LIANG. PhD Student at U Iowa. Summer internship at the United Technologies Research Center, 2013
- Lianpeng Guo. PhD Student at UC Berkeley. Summer internship at the United Technologies Research Center, 2012

Teaching Experience

- Model-Based Engineering: State-of-the-Art, Gaps, and Needs
Invited Lecture, EE149/249, University of California, Berkeley, 2021
- DARPA Proposal Writing
Internal 1-day class at United Technologies Research Center, 2019
- Embedded System Design
Lecturer, one-semester class at the undergraduate level, University of Udine, Italy, Fall 2006
- Introduction to Microelectronic Circuits – EE40
Lecturer, University of California, Berkeley, Summer 2004
- Embedded System Design – EE249
Teaching Assistant, University of California, Berkeley, 2004
- Embedded System Design – EE249
Teaching Assistant, University of California, Berkeley, 2003

Professional Services

Academic

- Selection committee member, Cyber-Physical Research Center Best Thesis Award, UC Santa Cruz, 2024
- Selection committee member, Cyber-Physical Research Center Best Thesis Award, UC Santa Cruz, 2023
- PhD Advancement committee member, Paul Wintz, UC Santa Cruz, 2023
- Selection committee member, Cyber-Physical Research Center Best Thesis Award, UC Santa Cruz, 2022
- Selection committee member, SIGBED Paul Caspi Memorial Dissertation Award, 2021 – 2022

Chair/Organizer

- *Symposium Co-Lead*, “Too Distant, Too Uncertain, Too Unforgiving: Assuring Autonomous Space Explorers We’ve Yet to Trust” (Keck Institute for Space Studies) (KISS Study Program 2026)
- *Conference Co-Chair*, NASA Formal Methods Symposium (NFM 2026)
- *Conference Co-Chair*, Engineering Reliable Autonomous Systems (ERAS 2025)
- *Program Co-Chair*, IEEE Space Mission Challenges for Information Technology (SMC-IT 2024)
- *General Chair*, IEEE Space Mission Challenges for Information Technology (SMC-IT 2023)
- *Workshop Co-Chair*, Design Automation for CPS and IoT (DESTION 2022), Co-located with IEEE/ACM CPS-IoT WEEK 2022
- *Program Co-Chair*, Design Automation for CPS and IoT (DESTION 2021), Co-located with IEEE/ACM CPS-IoT WEEK 2021
- *Organizer*, Accelerating AI for Embedded Autonomy Workshop, September 2020, Co-located with the Embedded Systems Week 2020
- *Organizer*, Accelerating AI for Embedded Autonomy Workshop, October 2019, Co-located with the Embedded Systems Week, 2019
- *Co-Chair*, Numerical Software Verification Workshop, 2018
- *Session Chair*, Future of IC Reliability, 49th Design Automation Conference, 2012

- *Tutorials Chair*, Embedded Systems Week 2013
- *Moderator*, Performance and Power Issues in Embedded System-Level Design, International Conference on Computer-Aided Design, 2009

Program Committees.....

- The 26th International Conference on Runtime Verification (RV 2026)
- Engineering Reliable Autonomous Systems 2026 (ERAS 2026)
- 6th International Workshop On Design Automation For CPS and IoT (DESTION 2024)
- 60th Design Automation Conference (DAC), Design, Verification, and Validation Track, 2023
- International Workshop on Applied Verification for Continuous and Hybrid Systems (ARCH 2023)
- 59th Design Automation Conference (DAC), Autonomous Systems Track, 2022
- International Workshop on Applied Verification for Continuous and Hybrid Systems (ARCH 2022)
- Design Automation and Test In Europe (DATE), Topic E3 : Machine Learning Solutions for Embedded and Cyber-Physical Systems, 2022
- 28th IEEE Real-Time and Embedded Technology and Applications Symposium (RTAS), 2022
- 27th IEEE Real-Time and Embedded Technology and Applications Symposium (RTAS), 2021
- Design Automation and Test In Europe (DATE), Topic E3 : Machine Learning Solutions for Embedded and Cyber-Physical Systems, 2021
- International Workshop on Applied Verification for Continuous and Hybrid Systems (ARCH 2021)
- International Workshop on Applied Verification for Continuous and Hybrid Systems (ARCH 2020)
- International Workshop on Applied Verification for Continuous and Hybrid Systems (ARCH 2019)
- International Workshop on Applied Verification for Continuous and Hybrid Systems (ARCH 2018)
- International Workshop on Applied Verification for Continuous and Hybrid Systems (ARCH 2017)
- International Workshop on Applied Verification for Continuous and Hybrid Systems (ARCH 2016)
- 24th International Joint Conference on Artificial Intelligence (IJCAI) 2015
- International Workshop on Applied Verification for Continuous and Hybrid Systems (ARCH 2015)
- Modeling in Human-Machine Systems: Challenges for Formal Verification, AAAI Symposium, 2014
- IEEE International Symposium on Industrial Embedded Systems (SIES), 2013
- IEEE International Symposium on Industrial Embedded Systems (SIES), 2012
- IEEE International Symposium on Industrial Embedded Systems (SIES), 2011
- IEEE International Symposium on Industrial Embedded Systems (SIES), 2010
- International Conference on Embedded Software (EMSOFT), 2010
- 47th Design Automation Conference, 2010
- 46th Design Automation Conference, 2009
- 5th Workshop on Synchronous Languages, Applications, and Programming (SLAP), 2006

Others.....

- *Chair*, AIAA System Engineering Committee on Standards (SECoS), 2025-present
- *Associate Editor*, IEEE Transactions on Automation Science and Engineering, 2016-2019

Memberships.....

- *Senior Member*, Institute of Electrical and Electronics Engineers (IEEE)
- *Senior Member*, American Institute of Aeronautics and Astronautics (AIAA)

- [2] Zamira A. Daw Perez, Alessandro Pinto, Richa Varma, Olusegun T. Oshin. Systems and methods for operating multiple-level autonomous cargo handling systems, U.S. Patent 12 085 914, Sept. 10, 2024.
- [3] Zamira A. Daw Perez, Alessandro Pinto, Richa Varma. Systems and methods for safely operating autonomous cargo handling systems. U.S. Patent 12 060 165, Aug. 13, 2024.
- [4] Zamira A. Daw Perez, Alessandro Pinto, Richa Varma, Olusegun T. Oshin. Systems and methods for run-time self-assessment of cargo handling systems, U.S. Patent 11 958 628, Apr. 16, 2024.
- [5] Zamira A. Daw Perez, Alessandro Pinto, Richa Varma, Xiaobin Zhang, Binu M. Nair, Autonomous system for air cargo end-to-end operations, U.S. Patent 10 994 865, Dec. 5, 2023.
- [6] Zamira A. Daw Perez, Alessandro Pinto, Richa Varma, Xiaobin Zhang, Binu M. Nair, Self Calibrating Multi-Sensor Cargo Handling System and Method, U.S. Patent 11 203 431, Dec. 21, 2021.
- [7] Zamira A. Daw Perez, Alessandro Pinto, Richa Varma, Binu M. Nair, Xiaobin Zhang, Aaron J Roberts, and Scott Harms, On-board unit load device weight estimation, U.S. Patent 10 782 179, Sep. 22, 2020.
- [8] Amit Bhatia, Zamira Daw Perez, Alessandro Pinto, Julian C. Ryde, Autonomous cargo handling system and method, U.S. Patent 10 005 564, Jun. 26, 2018.
- [9] Zamira A. Daw Perez, Alessandro Pinto, Richa Varma, Olusegun T. Oshin. Real-time communication link with a cargo handling system. U.S. Patent Application 20 210 319 683, Oct. 14, 2021.
- [10] Zamira A. Daw Perez, Alessandro Pinto, Richa Varma, Olusegun T. Oshin. Real-time tracking of cargo loads, U.S. Patent Application 20 210 319 397, Oct. 14, 2021.
- [11] Zamira A. Daw Perez, Alessandro Pinto, Richa Varma, Xiaobin Zhang, Binu M. Nair. Multi-robot system for cargo handling. U.S. Patent Application 20 200 122 834, Apr. 23, 2020.

Invited Talks and Panels

- [1] A New Playbook for Assuring Autonomous Systems
Seminar speaker, University of California, Los Angeles, 2026.
- [2] An Engineering Lifecycle Assurance Process for Autonomous Space Systems
Invited Talk, NASA Software Engineering and Software Assurance Working Group Meeting, 2026.
- [3] The Second IEEE International Workshop on Assured Autonomy, Artificial Intelligence and Machine Learning (WAAM)
Panelist, Designing Autonomous/AI/ML Systems for Assurance, 2023
- [4] Architectures and Machine Learning Models for High Assurance Autonomous Systems.
Tutorial, Design Automation Conference (DAC), 2023
- [5] Resolving Barriers to Infusion: Fielding Dependable Autonomous Space Systems.
Invited panelist, ASCEND Conference, 2023
- [6] Workshop on the Verification of Autonomous Systems (VAS).
Invited panelist, International Conference on Robotics and Automation (ICRA), 2022
- [7] Model-Based Engineering.
Seminar speaker, University of California, Santa Cruz, Seminar Series, 2022
- [8] Compositional Specification and Verification of Autonomous Systems.
Seminar Speaker, Safe Aviation Autonomy Research Seminar, Stanford University, 2021

- [9] Assured Autonomy: Need for Engineering Methods.
Invited Talk, Workshop on Assured CPS Autonomy for 3D Urban Transportation: Drones, Flying Cars and Beyond, 2021
- [10] Design of Autonomous Systems: Engineering, Science, or Art?.
Invited panelist, Design Automation Conference, 2020
- [11] Embedded Autonomy.
Invited Seminar, think Lab Distinguished Speaker Series, IBM Research – Almaden, 2019
- [12] Planning Via Constrained Markov Decision Processes.
Seminar speaker, Center for Information and Systems Engineering (CISE), Boston University, 2019
- [13] Embedded AI.
Invited Talk, Arizona State University, 2018
- [14] Stochastic Analysis of Cyber-Physical Systems.
Invited Talk, Computation-aware Algorithmic Design for Cyber-Physical Systems Workshop, Conference on Decision and Control, 2018
- [15] Knowledge-based Architectures.
Invited talk, Workshop on Complex Collaborative Systems, IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS), 2017
- [16] Demand for Unmanned Symposium.
Invited Panelist, The Verification and Validation of Intelligent Machines, 2017
- [17] Workshop on Verification and Control of Cyber-physical Systems: Theory and Applications.
Invited Talk, 55th Conference on Decision and Control, 2016
- [18] Verification of Autonomous Systems.
Invited Talk, 31st Annual National Test and Evaluation Conference, 2016
- [19] Trans-Atlantic Modeling and Simulation for Cyber-Physical Systems,
Invited US industry representative, Georgia Institute of Technology, 2015
- [20] Application of Constrained Decision Processes to Mission Planning.
Invited Talk, "Constrained decision-making in robotics: models, algorithms, and applications" workshop, Robotic Science and Systems, 2014
- [21] A short list of skills needed to build autonomous systems.
Invited Talk, Workshop on Cyber-Physical System Education, Embedded Systems Week, 2014
- [22] Modeling Complex Industrial Systems.
Panel Moderator, Embedded Systems Week, 2013
- [23] Code Generation Infrastructure for a Multi-Modal Synchronous MoC
Invited Talk, Workshop on Software Synthesis, Embedded Systems Week, 2013
- [24] On the development of tools for system design.
Invited Seminar, Model-Based Systems Engineering Colloquium, Institute for Systems Research, University of Maryland, 2011
- [25] Model-Based Design of Uncertain Systems: Why and How.
Invited Seminar, Center for Control, Dynamical Systems, and Computation, UC Santa Barbara, 2011
- [26] Model-Based Tool Chains for the Probabilistic Analysis of Complex Systems
Invited Seminar, Center for Information and Systems Engineering, Boston University, 2010
